

What kind of retaliation can be considered if Trump is reelected?

December 13, 2020

Section 1: Possibility of strict investigation due to fraudulent elections for important reference person Biden candidate

Using the Justice Department and the FBI, which have finally begun to move, a full-scale interrogation of Biden's son Hunter Biden has begun to investigate the bribery fraud of the Chinese Communist Party.

Since there seem to be too many illegal cases in suspicious incident of Hunter Biden, the investigation has started with tax evasion, but it is expected that the involvement of Biden candidate will be cracked down in the investigation process.

Biden's investigation may not be conducted until the election of the Federal House of Representatives on January 6 next year, and it is expected that the investigation will begin in earnest after the Trump re-election will be decided. Until then, there is less risk of being assassinated from antisocial forces because there is personal protection for the presidential candidate.

The problem is known after January 6th 2021. If the suspicion of Biden and his son becomes clear and the rebellion in the fraudulent election will become clear, the military will take measures in investigation of Biden as an important reference at the direction of the military court and restrain him for his personal protection against assassination.

In addition, if the candidate Biden be cross-examined in military investigation, there is a high possibility that other interviews will be conducted with executives who are said to be Democratic Party leaders such as Chairman Pelosi.

In other words, it is expected that a military-led judicial investigation will be conducted against the treason of overthrowing the nation due to a large-scale

fraud in collaboration with the Chinese Communist Party by the Democratic Party in the presidential election.

It is assumed that various antisocial forces will hinder in investigating the involvement in fraudulent elections by influence of the powerful powers who have been dominated the political economy in the United States, and the conventional federal prosecution cannot fight against the horrible strong power.

It is no doubt that the investigation will hit a snag if only federal prosecution be fighting. Therefore, from the beginning, important witnesses and suspects will continue to be deliberated in the military court under the military protection.

Section 2; January Senator Voting in Georgia Correctly Conducted Under Military Supervision

"We The People," in which Powell and Lin Wood are working separately from Trump's lawyer camp to recover popular sovereignty, is the first word in the preface to the Constitution and the symbolic word of a national movement to regain the spirit of the Constitution.

As we know, the final vote on the two-seat senator in Georgia on January 5 next year has become more important to ensure the election of Vice President Mike Pence. We hope it will be implemented under strict election management including postal voting, but we cannot help becoming doubtful for the present State's election system.

Therefore, if martial law limited to elections be issued after Dec. 14th, the elections will be managed strictly under the supervision of the military, and finally it is very likely that two will be elected by the Republican Party.

Perhaps the Martial Law limited to Election (MLE) may continue to be enforced for the next 1-2 years, after the State military will monitor fraud in state elections and the Federal Security Forces will watch the federal-level elections. Under the strict military management in the election, we expect that the people will continue to be able to hold elections without worrying about fraud.

In that case, suspicious foreign counting machines such as Dominion voting machines will not never used at all. Japanese voting machine makers (such as Musashi and Glory) may think it for their new business opportunities, but in any case, it is highly likely that voting machines made in the United States will be a prerequisite for procurement of USA, while there is a demand for technical guidance to teach US makers advanced know-how to prevent fraud.

Section 3; Strict enforcement of the Presidential Decree (9-12-2018) leads to maintain security in the United States

On September 12, 2018, the " Executive Order on Imposing Certain Sanctions in the Event of Foreign Interference in a United States Election" was issued to the federal government and the military. The content identified whether there was an election obstruction by a foreign power within 45 days after the end of the election in the United States.

The Attorney General and the Secretary of Homeland Security must report to the President the foreign interference in the election, including voting machines and voting systems. All domestic property, including funds, financial transactions such as borrowing, and commercial activities can be frozen against foreign powers and any domestic collaborators or cooperating companies.

Already, Chinese Communist officials in the United States are only allowed for visa within one month. If this law is strictly enforced in the future, all major Chinese companies listed on the US stock exchange related to the Chinese Communist Party will be punished under the law and subject to sanctions.

The possibility of the President's order for state of emergency is increasing. The aim is clear to enforce indirect sanction to the financial Deep State related to this fraudulent election.

Major domestic media companies, large companies such as Facebook and Twitter, and Democratic Party organization may also be included in the sanction target, and the sanction target list will be available by December 18th. Companies on the list will need to take some preventive action, but it will be difficult to save them.

Facebook is already accused of the acquiring video processing companies as

subsidiaries under the Antimonopoly Act. Because the scale was too large, there was a possibility of business split. In the past, Article 230 of the Internet Clause of the US Telecommunications Law states that the operating company only provides a portal site, so it has been exempted from prosecution of internet users.

On the contrary, Twitter and YouTube have strengthened the censorship function, and there is a growing possibility that Article 230 will not be applied. If it happens, the risk of proceedings would increase to make serious damage on the management.

Even before the election, major US media companies were biased and reported terrible anti-Trump fake coverage to audience or readers without media insight and morals. It was ridiculous to say that they reported to confirm Biden to the President after getting the news that the Federal Supreme Court dismissed the Texas complaint on Dec. 11th.

They reported Trump as a bad guy who doesn't admit to losing the election since then. If Trump issue the martial law, they will be confused and will not report anything, since it is far beyond their imagination.

Perhaps while continuing biased reporting, they become serious news media idiot who cannot analyze the situation as a news agency, and could rudely report only superficial things emotionally, including the director of the news bureau.

If the management is too biased and gives to the media journalists much biased opinions, the site staff will completely lose their good sense of journalist. I feel sorry to say that they with first-class news career such as ABC will be treated as incompetent stupid staff in the local stations or online news stations, after they face re-employment.

CNN's president has set up malicious reports at an internal meeting to put President Trump in a difficult situation, it was revealed in the online release of wiretapping recordings, and the maliciousness has become a problem in the United States. The coverage of the three major networks, ABC, CBS, and NBC, are often biased to be a problem.

And if it is on the sanctions list of this presidential decree, there will be some crackdown on the management. If they are subject to sanctions, it will be practically difficult to continue the business.

But without any additional sanctions, viewers across the United States are no longer watching these unusually biased broadcasters, and ratings continue to decline. Sponsors are also beginning to avoid advertising from broadcasting stations in such biased coverage. Now the top ratings in the news field are FOX, OAN, NEWSMAX and Epoch Times, which the mainstream media used to rank down in past.

Section 4; If the Foreign illegal intervention is clear in the military court, there may be military retaliation

After the issuance of martial law, it will be rigorously deliberated in military courts for figuring out the magnitude of the damage done by the Chinese Communist Party to the United States in this fraudulent election. If it be certified and serious, then they will take retaliation measures in national defense for protecting the United States.

In process of the retaliation measure, it is assumed that military sanctions on bio-weapon research bases may have been under consideration and other bases will be attacked if necessary. Military forces will investigate any incidents to blackmail the general public and uproot threatening antisocial forces, capture them against their resistance.

The Department of Justice, the FBI, and the CIA are already completely unreliable to capture nation-wide Mafia, Antifa, and BLM, and so the military task force will be organized to get these suspects in military jail.

They will use the latest high-hit automatic rifle and so it is assumed that all may be dead after a fierce shooting battle prior to their capture like the city battle.

After the issuance of martial law and subsequent elections by federal members of the House of Representatives, it is certain President Trump will start second term, and his first major task in second term is to impose military sanctions on the Foreign illegal forces against USA.

The NATO army is already aware that the United States has been attacked by biological weapons and even overthrow in the presidential election. If the United States is attacked in NATO regulations, major European countries are supposed to impose military sanctions together, and there is a carrier strike movement from the United Kingdom.

It is expected to berth for a long time off the coast of Hong Kong, which is unfairly controlled by its enemy. The French army will also dispatch the navy to the China Sea and carry out joint military exercises in Japan with the United States and France.

At the request of President Trump, a military attack on a ship invading Japan's territorial waters in the Senkaku Islands could be required along with the Japan-US alliance. It will be necessary to cooperate more closely with the US military on what kind of defense of the Senkaku Islands will be carried out by Japan and the United States in cooperation with the defense of Japan.

Regarding Taiwan defense, it is expected that the United States will already be serious about starting military sanctions on the Foreign government, if they move to fight against the United States.

In the serious situation we still hope the United States will solve the problem in peace and the problem foreign forces will obey any order from NATO and USA.
